Better Texture, Cleaner Label

The clean-label trend is in full force. It’s not enough anymore to make products that consumers crave. Manufacturers increasingly want to offer food and beverages that consumers perceive as ‘healthier’ or more ‘natural’.

Research shows consumers say package labels are the No. 1 factor that influences their decisions to buy a healthy or natural product. This finding means sourcing label-friendly ingredients, such as non-GMO texturants that label simply as ‘corn starch’, can go a long way toward winning your consumers’ trust – and their business. That’s where CLARIA® starches come in.

Benefits of CLARIA® Functional Clean-Label Starches

• Comparable in process tolerance to modified starches and other functional clean-label starches
• Deliver clean taste and colour
• Use CLARIA® technology, a proprietary technology that has been shown to provide improved sensory attributes (colour and flavour) vs. other functional clean-label starches
Introducing CLARIA® Instant
Instant, functional clean-label starch

The full line of CLARIA® Functional Clean-Label Starches just got better. CLARIA® Instant is easy to disperse and quick to build viscosity in low-temperature processes and high-solids foods. Like every starch in the CLARIA® line, CLARIA® Instant is versatile enough to help solve formulation challenges across a broad range of applications and processes.

CLARIA® Instant
CLARIA® Instant is a non-GMO, functional clean-label starch that builds viscosity without cooking. Try it when you need the convenience of an instant starch.

Benefits
• Shows process tolerance suitable for various and controls spread temperature, acidity, shear and harsh processing conditions
• Provides immediate viscosity and controls spread in high-solids systems such as fruit fillings
• Easily builds viscosity in cold-processed applications such as salad dressings
• Delivers a clean taste and neutral colour profile
• Enables similar sensory attributes to traditional modified food starch
• Offers excellent bake stability control compared to traditional modified food starch

Challenge and Solution
To formulate a clean-label sauce, you need a starch that delivers similar functionality to modified food starches, not just in terms of process tolerance, but also in its clean taste and neutral appearance. CLARIA® Instant offers a clean flavour and excels in applications with high whiteness, such as sauces, salad dressings and pastry creams.
The Full Line of CLARIA® Functional Clean-Label Starches

CLARIA® Instant is just one solution in a versatile line of non-GMO, clean-label starches. No matter the application or the challenge, there’s a CLARIA® starch that can help you create a product with great taste, great texture – and a label your consumers can understand and trust.

“Customers are increasingly searching for innovative ways to simplify their ingredient lists. But sometimes, cleaner labels come with trade-offs. We’ve worked hard to ensure our customers don’t have to make those trade-offs – helping to make their products both healthier and tastier”

Judy Whaley, VP Texturant R & D and Innovation
